

PCB Assembly QA Card

Inspection Checklist for Soldered PCB

Board Number: _____

Technician: _____

Checklist:

- ☐ Solder 2 resistors

Ensure resistors are correctly placed and soldered with clean joints

- ☐ Solder RTC, SD, and ADC female headers

Headers aligned straight and flush with the PCB; no cold joints

- ☐ Solder LTE and Arduino female headers

Verify SDA and SCL header pins are included and correctly oriented

- ☐ Solder 2 MOSFETs

MOSFET orientation must match PCB silkscreen marking

- ☐ Solder 3 screw terminals

Confirm orientation (receiver should face away from the PCB) and that terminals are seated flat on PCB

- ☐ Even solder amount and shape

Concave, shiny finish; no cold joints or solder bridges

- ☐ Visual inspection complete

Check for missing pins, bridges, or cold joints

- ☐ Continuity test passed

Use multimeter to confirm electrical continuity for all signal and power pins

Final Status: ☐ Passed ☐ Needs Rework

Date: _____

Notes:
